

Nikhef Project Support

Roel Aaij

June 6th 2019

Nikhef

The logo for Nikhef, featuring the word "Nikhef" in a sans-serif font. The letter "i" has a dot. The letter "k" is stylized with a vertical line extending downwards from its stem. The letter "h" is stylized with a vertical line extending downwards from its stem. The letter "e" is stylized with a vertical line extending downwards from its stem. The letter "f" is stylized with a vertical line extending downwards from its stem. The logo is centered on the slide.

2 Requested Features

- Repositories for version control
- Issue tracking
- Document management
- Release management
- Continuous integration
- Time lines
- Project-tracking boards
- Chat
- External Collaboration
- Integration of all of the above

Initial set of Features

Highest Priority

- Version control
- Document management
- Continuous integration

Second Step

- Chat
- Project Management Boards
- External Collaboration

Ideas for Technologies

Basically

- Gitlab (repositories and CI)
- JIRA
- Rocket Chat or Mattermost

- JIRA is very close to being selected by the project management working group
- Devops and experiments either use or have experience with gitlab

Backend

- Containers, potentially in VMs?
- People, time, cost of development and operation are need to be considered carefully
